Durability, ease of use and the highest quality - with the purchase of your Soehnle Industrial Solutions product you have made an excellent decision.

With our **services**, your scales are also optimally protected.

⑤ With the **warranty extension** for end customers, you have the option of extending the two-year manufacturer's warranty by a further two years for a reasonable price.

⑤ Sign a Soehnle Industrial **maintenance contract** and rely on calculability of costs and enjoy continuous professional maintenance.

⑤ Don't miss any more recalibrations, have your scales checked and get support in calibration - use our expert **calibration service** for legal-for-trade scales.

⑤ **DAkks calibration** of non-automatic electronic scales according to DIN EN ISO/IEC 17025:2005. DAkks accreditation confirms compliance with international standards, guidelines and laws.

DAkKS calibrations

to determine the measurement uncertainty

During calibration, the relationship of the display values to defined values of "standards" is determined. The resulting measurement uncertainty helps you to meet the requirements of your customers and the quality management system. At the same time, you also have proof of the "accuracy" of your weighing results and a reliable scale for quality-relevant processes.

New scales and transportable scales can be calibrated in our calibration laboratory in Backnang. To take actual environmental conditions into account and to minimize downtime, we also offer DAkKS on-site calibrations.

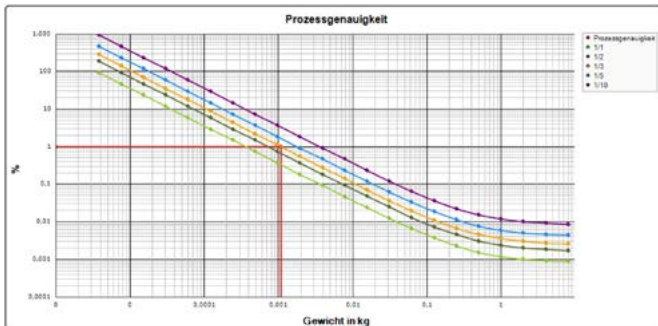

Diagram of relative measurement uncertainty

SIS Calibration Laboratory

DAkKS-accredited according to DIN EN ISO 17025:2005

Our in-house accredited calibration laboratory carries out technically competent calibrations, taking into account legal and normative requirements at an internationally comparable level.

Our service for you

- ▶ DAkKS calibrations of laboratory, precision, commercial, industrial and medical scales
- ▶ Weighing ranges up to 3,000 kg
- ▶ Testing, calibration and possible adjustment
- ▶ Permanent Laboratory
- ▶ On-site calibration
- ▶ Qualified specialist personnel
- ▶ Competence confirmed by the German Accreditation Body
- ▶ IT-supported calibration process
- ▶ Brand-independent service
- ▶ Issue of a calibration certificate
- ▶ Attaching of a calibration mark
- ▶ We create your individual offer

Measurement precision

for scales

- ▶ The scale is manufactured in our premises in Backnang, Germany.
- ▶ We are committed to Germany as a production location and play our part in strengthening it.
- ▶ Development, design, manufacturing - everything from a single source.
- ▶ Guarantee of a long-term spare parts supply.

For information on our product range, please request our complete catalogue or contact our sales staff.

We support you in all decisions along the life cycle of your scales - from purchase to operation/use to modernization.
