

# Smart Shelf

The networked shelving solution with integrated weighing technology

## Continuous stock monitoring

- ▶ The stocks of the individual items can be displayed in real time via our interface.
- ▶ Processes can be automated and thus contribute to increasing turnover.
- ▶ With the Smart Shelf, overproduction and thus food waste can be reduced, thus contributing to increasing sustainability.

## Avoiding low-in-stock / out-of-stock Situations

- ▶ Optimal availability of goods can increase customer satisfaction.
- ▶ Automated messages to employees or the head office when defined thresholds are not met.
- ▶ The Smart Shelf makes it possible to ensure a smooth production chain.

# Exploiting unused potential

- ▶ Increased effectiveness as well as material and goods availability through automated ordering processes.
- ▶ Increase in turnover through dynamic price adjustments depending on the inventory.
- ▶ Reduction of staff for inventory measures.
- ▶ Increase stock security through automatic monitoring and posting of stock changes.

## Possible areas of application

- ▶ Bakeries and bakery shops
- ▶ Fruit and vegetable departments
- ▶ Fresh food counters for sausage, cheese, meat or fish
- ▶ Snack bars
- ▶ Unpacked shops, farm shops and organic shops
- ▶ Canteens with self-service
- ▶ Industrial enterprises, manufacturing industry
- ▶ DIY stores
- ▶ Logistics
